Willow

CAPTIVA PLUS

Stylish, natural, solid colors with deep-embossed woodgrain texture

FIBER SEQUENCING TECHNOLOGY

Wolf Perspective Decking features Fiber Sequencing Technology. A unique core is made of densely packed coil-like strands of fiber encased in thermoplastic. Each board is then capped with a strong outer shell that helps prevent rot, decay, splinters, cracks or water absorption, resulting in long-lasting beauty.

DEXERDRY®

Add even more outdoor living space below your deck.

Create a tight seal with easy-to-install inserts that fit between boards and act like gutters. DEXERDRY keeps everything below your deck dry, is easy to maintain and works with all Wolf Perspective Decking collections. Available in 12', 16' and 20' lengths.
